

ADIS JOURNALS

The Adis portfolio is a premier collection of drug-focused journals and newsletters across the medical, biomedical and pharmacological areas.

Adis is a reputable publisher providing valuable content to readers, via a set of unique titles with features setting them apart from their competitors. The journals are all peer reviewed; many with expert in-house Editors-in-Chief overseeing the quality of the articles being published.

Practical and time saving: Adis Journals

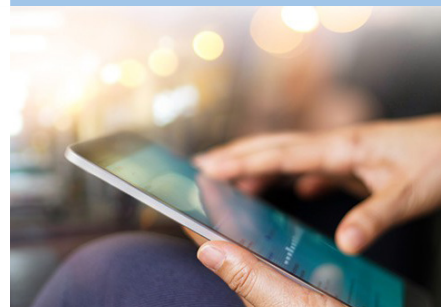

A leading provider of drug information offering authoritative reviews of complex clinical and specialist data. Save time with Adis review articles that summarize complex and broad topics as well as original research in all therapy areas. An invaluable source of information for anyone involved in medical research, practice or teaching, drug regulation or reimbursement, or any part of the pharmaceutical industry.

Trusted and relevant: Adis Drug Reviews

The Adis Drug Review program aims to provide readers with the most important and clinically relevant information on the properties of new and established drugs. The program covers all therapeutic areas. Adis Drug Reviews are written by a specialist in-house team and rigorously peer reviewed by international experts. A trusted resource for healthcare practitioners for more than 50 years.

Up to the moment: Adis Newsletters

Adis offers two specialist newsletters, to keep you informed on latest developments in the fields of drug safety, and pharmacoeconomics and outcomes research. *Reactions Weekly* offers summaries of the world's adverse drug reaction news and adverse drug reaction case reports. *PharmacoEconomics & Outcomes News* gives insight in health economics featuring latest news in pharmacoeconomics and outcomes research.

Adis journals with high citations

Drugs	Clinical Pharmacokinetics	Drug Safety
		
The world's most respected source of authoritative drug information. The Official Journal of the International Society of Pharmacovigilance [ISoP]. <i>Drug Safety</i> is the premier international journal covering the disciplines of pharmacovigilance, pharmacoepidemiology, benefit-risk assessment.

Journal Spotlight: American Journal of Clinical Dermatology

The **American Journal of Clinical Dermatology** promotes evidence-based therapy and effective patient management within the discipline of dermatology by publishing critical and comprehensive review articles and clinically focussed original research articles covering all aspects of the management of dermatological conditions.

Each article is accompanied by a Key Points summary, giving a time-efficient overview of the content to a wide readership. Articles may be accompanied by plain language summaries to assist readers who have some knowledge of, but not in-depth expertise in, the area to understand the scientific content and overall implications of the article.

The journal also includes various types of digital features to benefit the community including animated abstracts, video abstracts, slide decks, audio slides, instructional videos, infographics, podcasts and animations.

"I have had the privilege of being Editor of the *American Journal of Clinical Dermatology* (AJCD) for the last 12 years and during that time I have been delighted to witness a growing emphasis on evidence-based treatment in dermatology, and the emergence of many new biologic and targeted therapies that have made a profound difference to the outcomes of patients with various dermatological diseases. The AJCD is now ranked 5th among dermatology journals according to the Clarivate Analytics Journal Citations Reports for 2020, and feedback from clinicians is that they can rely on the journal for clinically relevant papers, including comprehensive reviews and original research articles."

Kathy Fraser
Editor, *American Journal of Clinical Dermatology*

What *American Journal of Clinical Dermatology* authors have to say:

"The *American Journal of Clinical Dermatology* provides high quality reviews for dermatologists. As a dermatologist, I find this journal as a "go to" when searching for efficacious treatment modalities for a variety of cutaneous disease. As a clinical researcher in dermatology, I also find that the journal does an excellent job at providing feedback and ensuring a smooth process from submission to publication. Also, with such a high impact factor, the journal reaches a large volume of readers ensuring that your research will be heard and make a difference. This is exemplified with our publication "**Cutaneous Squamous Cell Carcinoma: A Review of High-Risk and Metastatic Disease**" that has reached over 3,000 people and also has 93 citations.

Kurt Ashack, MD, FAAD & Amor Khachemoune, MD, FAAD

"My dermatology colleagues and I have published an update regarding **pyoderma gangrenosum** in the *American Journal of Clinical Dermatology* (AJCD). AJCD is a renowned dermatology journal and a home for medical dermatology advances and updates. Pyoderma gangrenosum (PG) is an interesting, challenging neutrophilic dermatosis that is difficult to diagnose and difficult to treat. We knew that the published paper would have a great visuality and the paper would be frequently cited and referenced. AJCD has a professional, enthusiastic staff and editor. Our published review paper in AJCD on PG has, like the other reviews, generated an enormous amount of citations, dialogues, and interaction in the scientific community. It has been my honour and privilege to work with the editorial staff at AJCD for many years and I hope that the collaboration continues for years to come."

Afsaneh Alavi, MD

"The *American Journal of Clinical Dermatology* (AJCD) has been at the top of my mind when considering which journals will give our team a high quality review and rapid publication. AJCD has grown as a go-to publication. It is highly valued by our trainees for the thoughtful and practical review articles. The global perspective is very well represented in the publication portfolio. The focus on Clinical Dermatology is the foundation of AJCD and there is an increasing need in the current environment to not lose sight of the importance and complexity of diagnosis and treatment with respect to severe skin disease. AJCD is often the first journal to kick start emerging areas. One of our Fellows, now full-time staff, was published in the early days of the journal, and that is one of the **most cited papers** in the field - thank you! Keep up the great work."

Neil Shear, MD FRCP
